Anthiyur, Erode (DT), Tamil Nadu

Objective

Motivated and detail-oriented developer with hands-on experience in Python, Flutter, and web development. Looking for an opportunity to apply my skills in application development, database management, and problem-solving while contributing to organizational growth.

Education

Master of Computer Applications (MCA)	2025 – 2027
<i>P.K.R Arts College for Women, Gobichettipalayam</i>	CGPA: 9.25
Bachelor of Science in Information Technology	2022 – 2025
<i>P.K.R Arts College for Women, Gobichettipalayam</i>	CGPA: 8.256

Technical Skills

Languages:	Python, Dart, HTML, CSS, JavaScript
Frameworks & Tools:	Flutter, Firebase (Authentication, Cloud Firestore, Storage), Git & GitHub
Areas of Interest:	Artificial Intelligence, Machine Learning, Internet of Things (IoT), SQL

Internship & Work Experience

App Developer Intern	1 Year (Ongoing)
<i>Akshayam 360 Global Learning System Pvt Ltd</i>	

- Developed the Staff Salary Management System, a real-time Flutter and Firebase application currently in active use by college administration for staff records and payroll processing.
- Developing the Dharani Cotton Mill Salary Management App, a client-based Flutter and Firebase desktop application for staff and labour payroll, built in collaboration with a teammate.
- Worked across the full app lifecycle – design, development, testing, and deployment – using Flutter, Dart, and Firebase.

Flutter Developer Intern	3 Months
<i>Poeage Technology</i>	

- Developed responsive, cross-platform mobile applications using Flutter and Dart as part of a live e-commerce project.
- Implemented state management using Riverpod to build a scalable and maintainable app architecture.
- Integrated Firebase Authentication and Cloud Firestore for secure user management and real-time data handling.
- Built reusable UI components and optimized application performance across screens.

Trainer	1 Year
<i>Akshayam 360 Global Learning Systems Pvt Ltd</i>	

- Trained learners in Python programming, Flutter app development, and web development (HTML, CSS, JavaScript) through hands-on, project-based sessions.
- Prepared training material, assignments, and practical exercises for Python, Flutter, and web development.
- Guided learners through mini-projects, resolved their doubts, and evaluated their progress.

Projects

Staff Salary Management System

[GitHub](#)

Flutter, Dart, Firebase Authentication, Cloud Firestore – Real-Time Production System, Akshayam 360 Global Learning System Pvt Ltd

- Built a Salary Calculator supporting CL, OD, LCL, LLP, PF, ESI, TDS, and attendance-based salary calculations, with full salary history and payroll record management via Firestore.
- Designed a responsive desktop/web admin interface with horizontal and vertical scrolling to handle large payroll tables, secured with Firebase Authentication-based role access.

Dharani Cotton Mill – Salary Management App

Flutter, Dart, Firebase Authentication, Cloud Firestore, Git – Client Project (Desktop), Akshayam 360 Global Learning System Pvt Ltd

- Built a four-role payroll system (Staff, Labour, MD, Exempted) in a two-developer team; owned the Staff and Labour modules end to end – records management, salary calculators, history, dashboards, and PDF export/print of salary slips.
- Implemented PF, ESI, OT, allowance, and attendance-based (including half-day) salary logic, and validated the output against the client's payroll sheets down to the rupee.
- Used a Git feature-branch workflow with a shared role router, resolving merge conflicts to integrate both developers' modules into `main`.

PoeageHub – Multi-Vendor E-Commerce Platform

Flutter, Firebase – Internship Project

- Contributed to a production-level multi-vendor e-commerce application with Seller Panel, Admin Panel, and User Interface built on a scalable architecture.
- Implemented authentication, inventory management, order management, and notification systems.
- Worked on real-time database synchronization and CRUD operations using Cloud Firestore.

BloodLink – Blood Donor Coordination App

[GitHub](#)

Flutter, Firebase – College Mini-Project

- Built a multi-role mobile application supporting Donor, Recipient, Hospital, Blood Bank, and Doctor roles for coordinated blood donation management.
- Designed a real-time SOS blood request system with multi-donor acceptance handling using atomic Firestore transactions.
- Implemented a radius-based nearby search system using the Haversine formula with Nominatim (OpenStreetMap) geocoding for location matching. Developed donor eligibility tracking, verified donation history, and an interactive map view for locating nearby hospitals and blood banks.

Certifications

- Python Programming Certification – Cisco Networking Academy
- Flutter Developer Intern – Poeage Technology
